Designing, Developing, and Delivering Online/Blended Learning Courses

In collaboration with

National Institute of Educational Planning and Administration
(Deemed to be University)

3rd October—7th October, 2023

About NIEPA

The National Institute of Educational Planning and Administration (NIEPA), (Deemed to be University) established by the erstwhile Ministry of Human Resource Development (now Ministry of Education), Government of India, is a premier organization dealing with capacity building and research in planning and management of education not only in India but also in abroad. It's vision is to evolve a human learning society through advancement of knowledge. In recognition of the pioneering work done by the organization in the field of educational planning and administration, the Government of India have empowered it to award its own degrees by way of conferring it the status of Deemed to be University in August, 2006. Like any Central University, NIEPA is fully maintained by the Government of India.

About the Programme

NEP 2020 recognizes the importance of online and blended learning in the modern education landscape and encourages the development of innovative and effective digital learning solutions to improve the quality and accessibility of education for all. Online learning refers to education that is delivered entirely through digital platforms, while blended learning refers to a combination of online and in-person learning. NEP 2020 recognizes the potential of technology to enhance the quality and accessibility of education and emphasizes the need to leverage technology for the benefit of students. The aim of this workshop is to provide you with practical guidance on how to design and deliver effective online/blended courses. Over the course of the workshop, the participants will learn about the key considerations and best practices for designing and delivering online/blended courses. This will include topics such as selecting appropriate technologies, designing engaging online activities, managing student engagement and communication, assessing learning outcomes, and creating a supportive learning environment.

Target Group/Participants

The regular Faculty members teaching in Tripura University

Learning Outcomes

Improved student engagement: By combining online and in-person learning experiences, students may become more engaged in the learning process.

Increased flexibility: Blended learning courses provide students with the flexibility to learn at their own pace and on their own schedule.

Enhanced collaboration: Blended learning courses can facilitate collaboration and group work, which can lead to deeper learning and improved problem- solving skills.

Improved technology skills: Blended learning courses require the use of various digital tools and platforms, which can help students, develop important technology skills.

Improved course design: Designing a blended learning course requires careful planning and consideration of both online and in-person learning experiences, which can improve the overall design and effectiveness of the course.

Increased accessibility: Blended learning courses can provide greater accessibility for students who may have difficulty attending traditional in-person classes.

Improved assessment strategies: Blended learning courses may require new and innovative assessment strategies, which can lead to more effective and meaningful assessments of student learning.

Competencies to be developed

Knowledge of online learning theories and principles: Understanding the different types of online learning, the benefits and challenges of online learning, and how to design and deliver effective online courses.

Corporate / Institutional Social Responsibility: For promoting Education Institution Social Responsibility towards the neighbours who give space, ground water, provide services and man power, manage waste, provide roads and transport

Skills in using online learning platforms and tools: To use learning management systems (LMS), video conferencing tools, and other online tools to create and deliver online courses.

Ability to design and develop engaging and interactive online content: Using a variety of media and activities to keep students engaged and motivated in their learning.

Skills in assessment and evaluation: To design and administer assessments that measure student learning, and using the results of assessments to improve the course.

Ability to facilitate online discussions and interactions: To create a supportive and collaborative learning environment, and to facilitate discussions and interactions among students.

Knowledge of blended learning models: Understanding the different ways that online and face-to-face learning can be combined, and how to design and deliver blended learning courses.

Ability to adapt to the changing needs of learners: Able to keep up with the latest trends in online learning, and to be flexible in adapting the course to the needs of the learners.

Expected Outcomes

Increased knowledge and understanding of online and blended learning pedagogy: Participants will learn about the principles of online and blended learning, as well as the different tools and resources available to them.

Improved skills in course design and development: Participants will learn how to design and develop effective online and blended learning courses, including how to create engaging content, assess student learning, and manage the learning process.

Enhanced ability to deliver online and blended learning courses: Participants will learn how to deliver online and blended learning courses effectively, including how to facilitate discussions, provide feedback, and manage student engagement.

Increased confidence in teaching online and blended learning courses: Participants will gain the confidence they need to teach online and blended learning courses effectively.
