

SERB Sponsored Workshop

Good and Bad Communities of Bacteria: Applications and Safety Concerns

Workshop Dates:
23rd to 24th March 2023

WORKSHOP DETAILS

The workshop is designed to sensitize participants with advantageous and detrimental aspects of bacterial biofilms. The two-day workshop will also include sessions on technological applications at the interface of bacterial biofilms and biosafety issues involved in advanced research and development. The participants will get an exposure over a range of themes from the fundamentals of bacterial biofilms to the recent trends in the research.

SERB Social Scientific Responsibility Initiative

The Infectious Diseases Laboratory in Department of Microbiology at Tripura University is led by Ashwini Chauhan, Ph.D with its research foci on understanding bacterial biofilms and development of anti-biofilm therapeutics. Currently, the lab is supported under various research funding schemes of SERB, ICMR, DST and UGC.

INFECTIOUS DISEASES LAB

SERB SSR policy intends to effectively utilize the R&D infrastructure and expertise of SERB supported research labs to benefit other S&T stakeholders and the society. Also, the initiative intends to embed a participatory, inclusive and sustainable culture of social responsibility among supported research labs.

TARGET PARTICIPANTS

The faculties of the colleges in the state of Tripura.

The total number of participants for the workshop is limited to 25 (Twenty Five) on a first come first basis. The registration cost of the workshop will be supported by the SERB, GoI for all the selected participants. There is no provision for TA/DA to attend the workshop.

The registration of participants include registration kit, access to all the workshop sessions, networking lunch on both the days of the workshop, tea/snacks. The certificate of participation will be provided to all the participants. Accommodation is available upon request.

REGISTRATION PROCESS

The interested applicants are requested to fill the application form at tinyurl.com/bacterialbiofilms
Last Date: 17th March 2023
